

REPORTING TB IN MDSS

Noreen Mollon, MS

Tuberculosis Epidemiologist

Timeline for Reporting

- Critical information within 7 days
 - Name and demographics
 - Site of disease
 - Lab info (if available)
 - Why is this TB
- Investigation Status “Active” or “New”

Timeline for Reporting

- Pages 1-5 [demographics, Lab info, Epi info, Treatment] of RVCT (detail form) within 30 days
 - All questions must have an answer!
- When complete set investigation status to “Review”
- MDCH TB staff will review and
 - Will set to “Completed Follow-up” **or**
 - Will follow up with you for question completion

Mycobacterium Other (MOTT)

- No need to complete the RVCT (detail) form
- Case Status = Confirmed
- Investigation Status = Review
- MDCH TB staff will close

Case Investigation Status definition

- **New:** a new case
- **Active:** a case that will be counted, information in RVCT (detail) form not yet complete
 - RVCT/State Case Number assigned here
- **Review:** Information in RVCT (detail) form is complete, ready for State staff to review for completion
- **Completed Follow-up:** Case has been counted, and submitted to CDC
 - All cases will remain at this status until treatment is complete
- **Completed:** Treatment is complete, Follow-up 2 on RVCT (detail) form has been updated
 - State staff will complete cases

Case Investigation Status definition

- **Confirmed Non-Resident:** a TB case that has been counted outside of the State of Michigan but has relocated and resumed therapy
 - This case status is used to measure burden. If your health department is treating an out of state case enter it here!

Is my case part of an Outbreak?

- Part of an Outbreak field (Y/N) and Outbreak Name
 - State staff will complete this field if a case in your jurisdiction matches a genotype with another case in MI
 - State staff will call you with significant findings
 - Always call if you have questions!
